July 31, 2020

FactRight LLC, a provider of financial due diligence and risk management services for the alternative investment industry, has promoted Kevin Kirkeby to manager. In his expanded role, he will oversee ongoing coverage of publicly registered, non-traded program reporting, while continuing to support FactRight's new offering engagements.

Kirkeby joined FactRight in mid-2019 as a senior analyst, initially focused on private placement and Reg A+ issuers. Prior to FactRight, he spent 11 years as an equity analyst, most recently at Standard & Poor's where he developed financial models and other analytical tools to assess corporate financial and operational health. Kevin holds a bachelor's degree from Concordia College and is a certified financial analyst charterholder.

"Kevin's promotion is part of FactRight's broader effort to provide broker-dealers and RIAs with reliable and

credible perspective in the alternatives market. His client service and financial background is a great fit for the ongoing analytic advice our clients are looking for on REITS, interval funds, and business development companies,” commented Gail Schneck, chief operations officer of FactRight’s FR Risk Management unit.

Established in 2006, [FactRight](#) and its affiliated entities provide third-party due diligence, compliance, risk management, and consulting services for financial firms and advisors interested in alternative investments.
